# The world's most advanced purification

technologies in a compact, convenient package for all of your drinking and cooking needs. Give your family the clean, healthful and fresh-tasting water they deserve with a Water Factory Reverse Osmosis Drinking Water Appliance.

**QUALITY, PERFORMANCE  
AND CONVENIENCE  
YOU CAN COUNT ON.**

## ULTIMATE CONVENIENCE

- Clean, refreshing, great-tasting water at your fingertips...not from the bottle.

## SUPERIOR EFFECTIVENESS

- Reverse Osmosis combined with premium Activated Carbon technology reduces up to 99% of unwanted impurities and eliminates bad taste and odors for sparkling clear water.

## HIGH PERFORMANCE

- Maximized output produces a plentiful supply of water for all drinking water and cooking needs.

## TOTAL TREATMENT

- Multiple advanced filtration technologies provide complete treatment of chlorine, taste and odors, dissolved solids, cysts, sodium and heavy metals in your drinking water.

## NSF INTERNATIONAL CERTIFIED AND LISTED

**NSF**

- Quality and performance tested by an independent, nationally recognized laboratory for your complete confidence.

Refreshing, flavor enhanced beverages.

Robust, great-tasting coffee or tea.

Sparkling, crystal clear ice cubes.

## ENGINEERED TO MEET THE DEMANDS

of today's household needs and family lifestyles, the Water Factory Reverse Osmosis Drinking Water System combines the latest in contemporary styling with compact, high-performance design.

### SPACE-SAVING DESIGN:

Compact design fits easily under your sink leaving ample room for additional storage.

### DESIGNER LONG REACH FAUCET:

Conveniently delivers delicious, clean water at your fingertips.

### HIGH-CAPACITY RESERVOIR TANK:

Extra large 2.0 gallon storage tank ensures an abundant water supply.

### AUTOMATIC SHUT-OFF VALVE:

System shuts off when tank is full for optimal water conservation.

## STATE-OF-THE-ART DRINKING WATER SYSTEM

Combines four filters for unsurpassed performance.

### PREMIUM PERFORMANCE GRADED DENSITY PREFILTER:

Removes sediment, dirt and other particles 8 times smaller than you can see.

### HIGH EFFICIENCY ACTIVATED CARBON PREFILTER:

Reduces chlorine and other unpleasant tastes and odors.\*

### REVERSE OSMOSIS TECHNOLOGY:

Uses semi-permeable membrane to divert dissolved salts, metals, chemicals, micro-organisms and other impurities to drain.

### HIGH PURITY CARBON POSTFILTER:

Polishes water to ensure fresh tasting, crystal clear water.

\* For SQC3 and SQC4 models
